DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 07 September 2006 has been entered.

Drawings

2. The drawings were received on 07 September 2006. These drawings are accepted by the examiner.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James J. Mullen III, Ph.D. on 28 September 2006.

This Application has been amended as follows:

In claim 90 (renumbered as claim 2), the term "claim 89" has been deleted and replaced with the term "claim 88".

In claim 96 (renumbered as claim 6) the term "taxol," has been deleted.

In the specification (filed 12/6/05) at page 12, line 14 the term "taxol" has been deleted and replaced with the term "TAXOL™".

STATEMENT OF REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

The present application is in condition for allowance in view of the amendments to claim 88, which recite that the claimed monoclonal antibody is conjugated to a diagnostic agent or a cytotoxic agent. While Williams et al (Molecular Microbiology, 27(1):171-186, 1998, previously cited on PTO-892 mailed 9/17/04) teach the OIP5 polypeptide, which is identical to the polypeptide of SEQ ID NO:728, Williams et al state that the function of the OIP5 polypeptide is unknown (see pg. 174, 2nd column). Thus, there is no requisite motivation to target a diagnostic or cytotoxic agent to the OIP5 polypeptide using an antibody specific for SEQ ID NO:728 (i.e., the OIP5 polypeptide). It is also noted that applicant's previously submitted declaration under 37 CFR 1.132 by Dr. Karen Jane Meyrick Morrison on 10/20/2005, demonstrates that the claimed polypeptide (SEQ ID NO:728) is expressed in prostate and lung cancer tissue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
